DETAILED ACTION

Allowable Subject Matter

Claims 11, 12, 15-20, 40, 41 and 71-77 are allowed.

The following is an examiner's statement of reasons for allowance:

Regarding claims 11, 12, 15-20, 40, 41, 71-73 and 75-77, please see reasons for allowance in office action dated 4/22/04.

Regarding claim 74, applicant has amended claim 74 to include matching the antenna impedance to the impedance of a transmission or receiving circuit based on a sensing signal indicated that the antenna is in a transmitting or receiving mode. Current cited prior art, Thompson (US Patent # 5,754,141) discloses a wireless communication device that includes an antenna and a matching circuit (figure 2, element 30) where the matching circuit matches the impedance of the antenna based only whether the antenna is in an extended position or in a retracted position. Neither Thompson, alone or in combination of other cited prior art disclose matching the antenna impedance to the impedance of a transmission or receiving circuit based on a sensing signal indicated that the antenna is in a transmitting or receiving mode.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Art Unit: 2684

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

US 6,611,691 Antenna adapted to operate in a plurality of frequency bands.

US 6,590,538 Antenna apparatus.

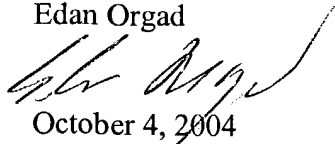

US 6,297,778 Apparatus and method for ensuring proper antenna position.
